Spectrogram

“Um neue Ideen erfolgreich zu entwickeln, ist ein detaillierter Stakeholderprozess nötig, in dem alle Beteiligten mit ins Boot genommen werden.”

Spectrogram (Alternative 1)

“In den letzten 500 Jahren ist die Hochschulinnovation ausschliesslich von den Professoren angetrieben worden, und daran wird sich auch bis 2060 nichts ändern.”

Spectrogram (Alternative 2)

“Innovation kann immer nur vom Rand kommen, und kann nicht von der Spitze geplant, gesteuert, oder gemanagt werden.”

A photograph of a modern, multi-story glass skyscraper at dusk. The building's interior lights are on, and the glass reflects the sky. A large, curved, illuminated structure is visible on the top floor. The sky is a mix of blue and orange, with a long, thin, orange streak in the upper right. The text 'Innovationskultur' is overlaid in the center in a white, sans-serif font. The word 'Innovations' is in a lighter weight, and 'kultur' is in a bold weight.

MIT pulls out of Asian Media Lab in argument over role

An effort to replicate in India the world-famous Media Lab, run by the Massachusetts Institute of Technology (MIT), has collapsed amid angry recriminations between the Indian government and the original lab in Cambridge, Massachusetts. Media Lab Asia, which opened in New Delhi amid much fanfare two years ago (*Nature* **411**, 623; 2001), will continue without MIT's involvement after an acrimonious meeting last week between Arun Shourie, India's information-technology minister, and Nicholas Negroponte, chair of the MIT Media Lab's governing board.

Media Lab closure 'a huge shame'

Mon, Jan 17, 2005, 00:00

f

The founder of MIT Media Lab, Prof Nicholas Negroponte, has said one of the reasons for the collapse of Dublin-based Media Lab Europe (MLE) was the reluctance of European companies, including Irish firms, to sponsor research.

t

MLE, which launched just as the technology sector sank into a severe economic crash, had to close because it could not meet financial targets through private sector support and did not receive sufficient public sector support or grants, he said.

in

MLE folded last Friday partly because its financial model of raising money from corporate sponsors "was freakishly untimely" he told The Irish Times in his first comments since the closure announcement last week.

\$40m down the bog

By Andrew Orlowski 4 Oct 2005 at 22:11

SHARE ▼

The Irish government invested \$40m of taxpayers' money in MIT's Media's Lab Europe - and has bugger all to show for it.

A report by the Republic's public auditor-general also reveals that Media Lab executives awarded themselves large severance pay-offs when the money was running out, and refused to refund public money as the original agreement had specified.

Eire's comptroller called the output of the Media Lab over five years "dismal". The Lab netted only €7m in sponsorship and saw just 24 scientific papers published. In addition, 12 patents filed by the Lab are worthless. The Lab added nothing to Ireland's education drive while it went its merry way, and after liquidation will leave the Republic with just €300,000 in assets.
