

Blended learning as the 'new normal' at Swinburne University of Technology (SUT)

The Learning Accelerator Program LEAP

## Bettina's Story

- Magister Artium 🎓 at Ludwig Maximilians University
- Tischschool of the Arts, NYU, 🎬 Director's Class
- TV Producer 📺 (900 episodes GZSZ and many more TV shows)
- Co-Founder of TV Akademie, Berlin
- 10 years in 🌈 Oz 🦘, Lecturer of FTV at Swinburne University of Technology (SUT), Grad Cert L&T HE, Educational and Learning Experience Designer at

University of Melbourne and Macquarie University,  
Academic Director Curriculum Accelerator and Digital and  
Strategic Projects Coordinator in the Learning  
Transformation Unit

Blended is the new normal

Imagine...we would prepare a fruit salad together

Imagine... we would blend fruits to a smoothie.

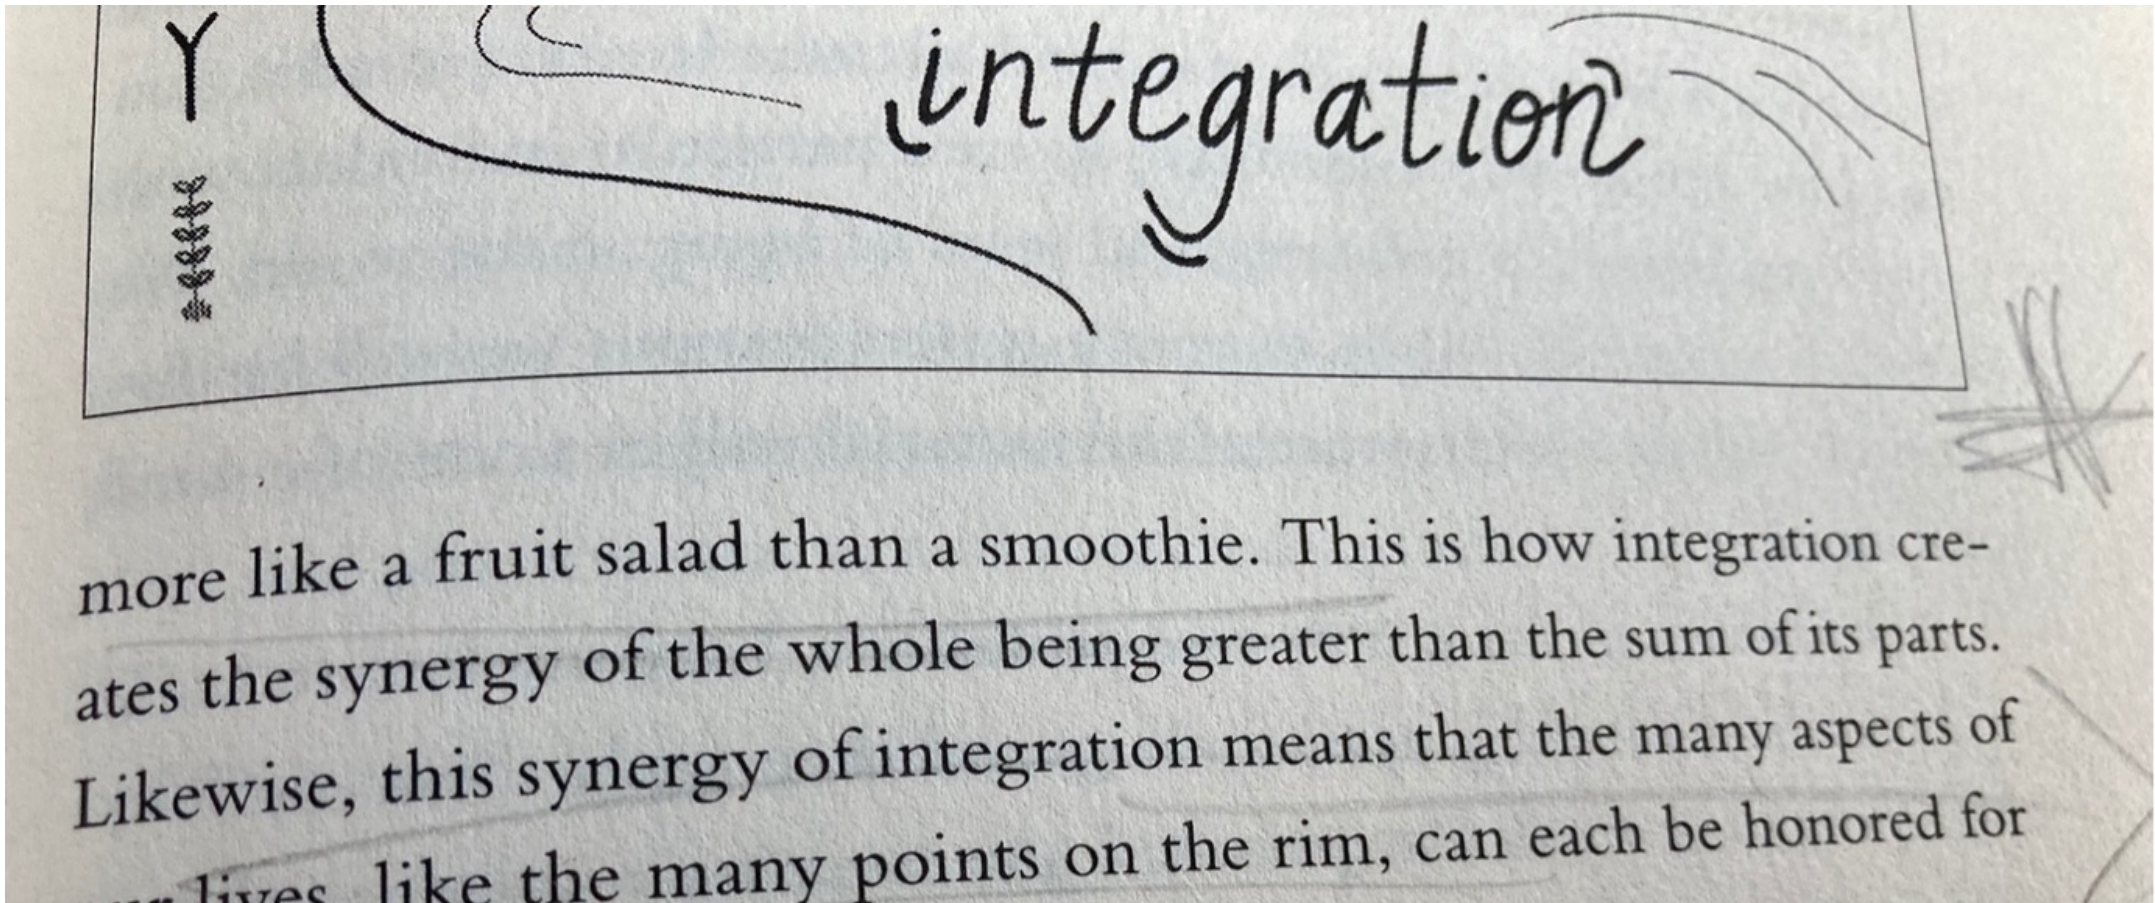

concepts  
A system that is integrated is in a flow of harmony. Just as in a choir, with each singer's voice both differentiated from the other singers' voices but also linked, harmony emerges with integration. What is important to note is that this linkage does not remove the differences, as in the notion of blending; instead it maintains these unique contributions as it links them together. Integration is

The blended approach at SUT reminds of the following concept:

*The differences of all elements are not removed, as in the notion of blending (as a smoothie), instead it maintains its unique contributions as it links them together.*

**Understanding the term "blended" rather like a fruit salad than a smoothie.**

more like a fruit salad than a smoothie. This is how integration creates the synergy of the whole being greater than the sum of its parts. Likewise, this synergy of integration means that the many aspects of our lives, like the many points on the rim, can each be honored for

*This is how BLENDED in the sense of integration creates the synergy of the whole being greater than the sum of its parts....each can be honored for their differences but then brought together in harmony.*

**= Blended at SUT**

(source: "Aware - the science and practice of presence" by Daniel J. Siegel)

# UNIVERSITY STRATEGY: **Horizon 2025**

*Horizon 2025 and the 4 moonshots* presented in the University's Horizon 2025 Strategy underpins and drives the Education Strategy.

*"People and technology working together to build a better world"*

MOONSHOT 1

Every Swinburne learner gets a work experience

MOONSHOT 2

Every Swinburne graduate gets a job

MOONSHOT 3

Every Swinburne partner gets a tech solution

MOONSHOT 4

Swinburne is the prototype of global best practice

## *Our Education Goals*

*"Empowering learners of diverse backgrounds to achieve their full potential in a digital, tech-rich future"*

### Creating Future-Ready Learners:

- Confident and enterprising learners who create social and economic impact
- Learners prepared to find and solve complex problems
- Adaptive learners equipped for careers of the future
- Learners as global citizens

## *Who are we*

*"Swinburne University of Technology is a **dual-sector** institution, defined by **technology and innovation**, and renowned for our strong **industry and community engagement**"*

## **SwinLearn Framework:**

- Blended learning as the 'new normal'
- All Swinburne courses will be purposefully developed for blended learning as the university's primary delivery mode. This will be progressively rolled out in consultation with Schools, course teams, teaching staff and student representatives.

- Bespoke course-level blending that incorporates online (synchronous and asynchronous) and location-based face-to-face experiences
- Staged and supported design via the Learning Experience Accelerator Program (LEAP)

#### SwinLearn Framework

The SwinLearn Framework boldly seeks to transform learning and teaching across the institution by implementing blended learning as our primary delivery approach. The interweaving of the best elements of online and face-to-face education is emerging as the predominant teaching mode of the future (Yen and Lee 2011).

Bringing to life each component of learning, in concert with each other, enables us to reconceptualise the on-campus and online student experience, and remain a leader in the sector. This underpins Swinburne's adoption of blended learning, which we define as the planned, systematic merging of physical and digital learning spaces to complement one another. It involves holistically weaving synchronous (online and face-to-face) and asynchronous content and activities to provide a more customised, student-centred learning experience. It is the thoughtful integration of classroom face-to-face learning experiences with online learning experiences (Garrison and Kanuka 2004 p. 96).

Our aim is to work with teaching staff to enhance their students' learning experience through innovative and authentic pedagogies informed by best practice and research. Building on the Transforming Learning Strategy, in a highly competitive environment where technological disruption has meant so much change, our focus will be on three key approaches:

**(1) Blended learning as the 'new normal':** All Swinburne courses will be purposefully developed for blended learning as the university's primary delivery mode. This will be progressively rolled out in consultation with Schools, course teams, teaching staff and student representatives.

**(2) Bespoke course-level blending that incorporates online (synchronous and asynchronous) and location-based face-to-face experiences:** While maintaining a consistent look and feel to units via Canvas, the specific balance between online digital learning and high-value face-to-face learning will vary according to the needs of the specific course. The vision will come from the course teams, with disciplinary considerations informing the specific blended learning design.

**(3) Staged and supported design via the Learning Experience Accelerator Program (LEAP):** Guided by the agreed vision for each course, the Learning Experience team, operating as part of LTU, will progressively work with course teams across the institution. Groups of teaching staff will be supported through a blended learning design program, involving self-paced online modules and a series of workshops. At the end of the program, they will have a purpose-built blended unit, and a 'toolkit' to then transform all their other current and future units. Additional modules, workshops and support will also be developed to support the broader strategic initiatives.

# LEAP

# Learning Experience Accelerator Program

## **The Learning Experience Accelerator Program (LEAP) is designed**

- to build the capabilities of teaching staff,
- enabling them to implement a purposeful blended learning approach,
- which interweaves all elements of learning and teaching.

## The LEAP Process

Capitalising on our existing good practice, an **evidence-informed approach** will be employed to support teaching staff to strengthen their offerings to meet the **university's mandate**. Groups of teaching staff will be supported **through a 8 week blended learning design program** at the end of which they will have a purpose-built blended unit, and a

'toolkit' to then transform all their other current or future units (with ongoing support from the LX/LTU team).

Throughout this process, all components of the **unit will be holistically developed** (online digital learning and high-value location-based face-to-face). The learning design will be informed by the Authentic Learning Blueprint, cognisant that learning needs vary significantly as students proceed along their learning journey.

**LEAP is designed in blended format to provide participants with an authentic learning experience and model the type of teaching we are supporting staff to deliver. It comprises 4 asynchronous online self-paced modules and 3 associated synchronous workshops.**

To accommodate the volume of staff, a carousel model will be employed, where cohorts of up to 30 staff will progressively commence LEAP at 2-week intervals, which will be staggered across 2022 and 2023.

Our LXDs will also run regular virtual and/or face to face drop in sessions to provide on-going support at scale, as staff progressively transform their units. A Community of Practice will also be established, and we will work with champions across each school.

# 40 hrs workload Learning Experience Accelerator Program

## Workshop 1: LEAP Kick-off Workshop

### Module objectives:

- Review learning and teaching theory and practice
- Situate your blended learning practice within the Swinburne context.

Module 1:  
Blended Learning  
at Swinburne

Module 2:  
Assessment in  
Higher  
Education

### Module objectives:

- Investigate a range of assessment types to apply to your blended unit
- Construct a unit assessment plan

## Workshop 2: Assessment Workshop

### Module objectives:

- Identify strategies for synchronous and asynchronous active learning
- Explore learning analytics and their use in Canvas
- Map desired engagement dynamics in your Unit Learning Design Plan template

Module 3:  
Active Learning  
Dynamics

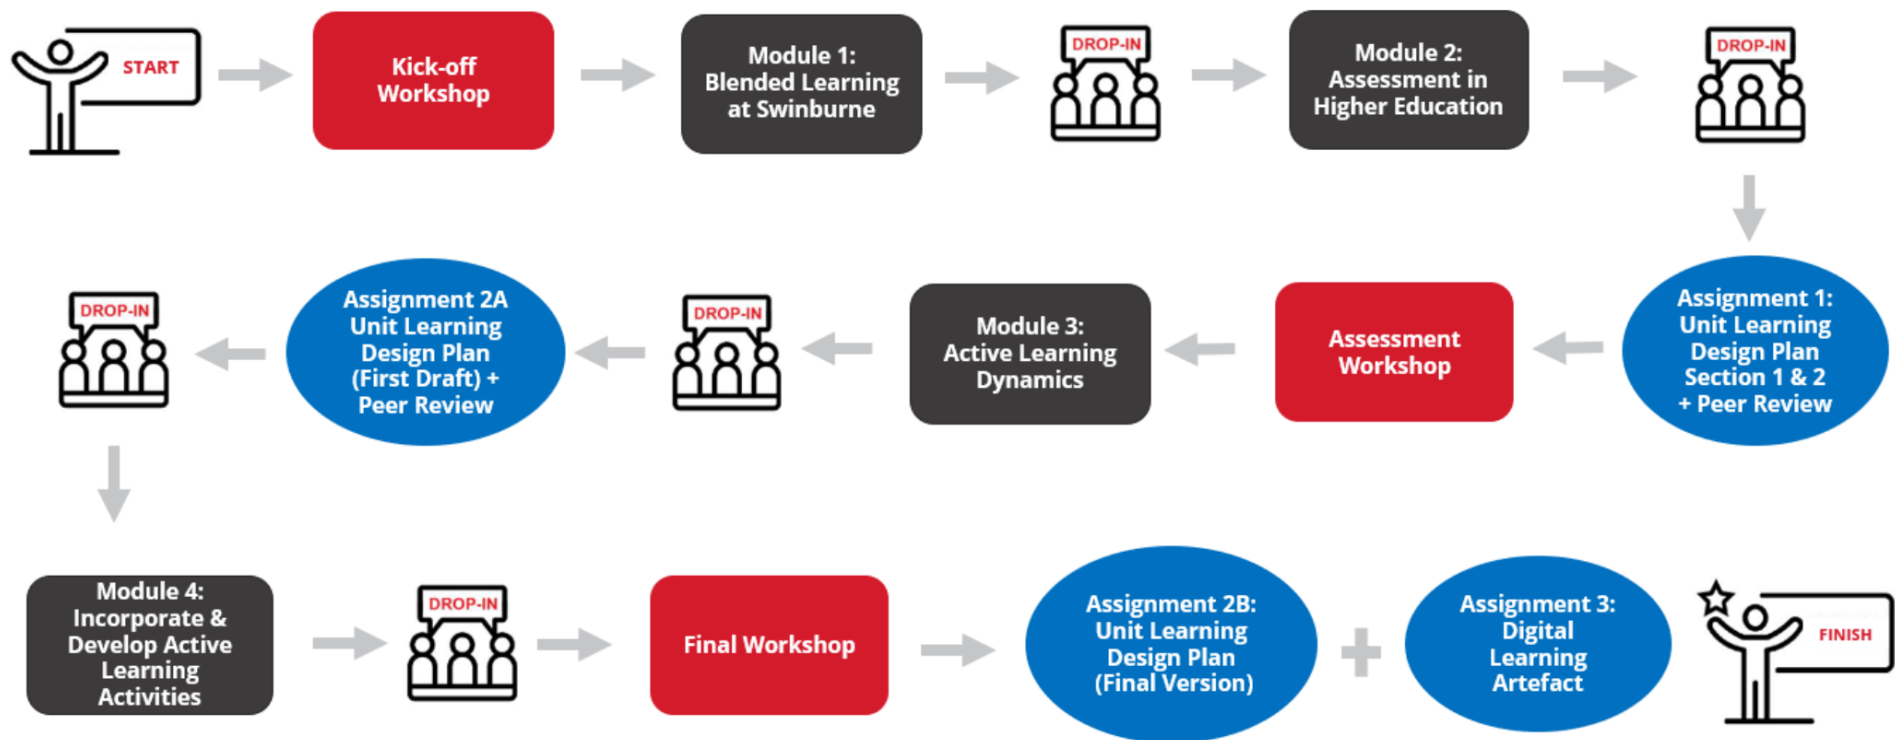

Module 4:  
Incorporate  
and Develop  
Learning  
Activities

### Module objectives:

- Identify potential multimedia tools and formats for your activities
- Start designing activities that can be used in your blended unit
- Evaluate and revise your activity designs in your Unit Learning Design Plan

## Workshop 3: Wrap-up Workshop

# Your LEAP Timeline

*Ten principles of blended learning at Swinburne:*

1. Learning activities are constructively aligned, authentic, complementary across face-to-face and online modes. Considerations for constructive alignment and complementary design
2. Students are provided with developmental feedback

3. Each unit has a constructively aligned assessment strategy that meets accreditation and university policy requirements, and provides opportunities to demonstrate a variety of graduate attributes across online and F2F mode
4. Students are provided with scaffolded resources to support skills development for success in assessment
5. Students are provided with a variety of learning activities to support their development, engagement and active learning
6. Design and implement a clear student communication strategy throughout the teaching period for F2F and online modes, which aims to provide information to all students in a consistent manner and provide individualised communications to students at risk of disengagement
7. Apply a systematic design to LMS site that is easy for students to navigate and is consistent across courses
8. Students are provided with full details about assessment tasks in Canvas assignments, including requirements and instructions, weighting, submission details, and assessment criteria
9. Canvas sites are functional across a range of browsers and devices, are suitable for ease of navigation on mobile devices, and compliant with relevant copyright regulations, in line with LTU Canvas Standards.
10. Apply accessibility standards as per Swinburne standards, WCAG 2.1AA guidelines and best-practice guidelines to always ensure access for all students.

# The Blended Learning Calculator

## 7. Blended Learning Principles for units at SUT \*

Review the principles below and indicate if they are currently present in your unit.

	Yes - completely	Yes - partially	Planned but not enacted	No
1. Learning activities are <b>constructively aligned</b> , complementary across face-to-face and online modes, and follow the principles of the <b>SWinburne Authentic Learning Blueprint</b> . i.e. whether enable seamless transition across learning modes, and match to students' experience with self-directed learning	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2. Students are provided with <b>developmental feedback</b> on learning activities and formative assessment in online and F2F learning modes, as well as for summative assessment. i.e. F2F and online learning activities provide feedback on students' progress towards learning outcomes, and formative assessment is used where appropriate.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3. Students are provided with a variety of assessment <b>tasks</b> that give them opportunities to demonstrate a variety of <b>graduate attributes</b> across online and F2F modes. <a href="https://www.swinburne.edu.au/undergraduate/2021/swinburne-graduate-attributes/">https://www.swinburne.edu.au/undergraduate/2021/swinburne-graduate-attributes/</a>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

3.1. Principles of <b>authentic assessment</b> are applied, as appropriate to discipline and industry/community practices and standards.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4. Students are provided with <b>scaffolded resources</b> , which are <b>purposefully integrated</b> into planned F2F and/or online learning activities, to support skills development for success in assessment. (can be sourced from Library, UAS and other sources as appropriate). <a href="https://www.swinburne.edu.au/life-at-swinburne/student-support-services/study-learning-support/learning-academic-skills/">https://www.swinburne.edu.au/life-at-swinburne/student-support-services/study-learning-support/learning-academic-skills/</a>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5.1. Students are provided with a <b>variety of engagement opportunities</b> in both online and F2F modes, i.e. <i>interaction with educators, content and peers</i> .	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5.2. Students are provided with a <b>variety of learning activities</b> – to reflect a range of authentic and real-world contexts, and provide opportunities to learn in different ways.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

5.3. Online learning activities utilise a range of **digital technologies and formats**, *e.g. for rich media/multimedia, as appropriate for discipline or industry/community practice*  
<https://www.swinburne.edu.au/about/strategy-initiatives/digital-literacies/>

6. A clear **student communication strategy** is utilised throughout the teaching period for F2F and online modes, which aims to provide information to all students in a timely and consistent manner.

6.1. Utilises standardised Canvas templates, learning analytics data, check-in survey results and grades monitoring throughout the teaching period.

6.2. Students are provided information about **mode/location** of learning activities, as well as **indicative time commitment**.

6.3. A clear plan is in place to send **individualised** communications to students **at risk of disengagement**.

7. The LMS site follows a systematic design that is **easy for students to navigate** and is **consistent** across courses (as much as practicable), *e.g. similar module structure.*

8. Students are provided with **full details about assessment tasks** in Canvas assignments, including requirements and instructions, weighting, submission details, and assessment criteria.

9. Canvas sites are **functional** across a range of browsers and devices, are suitable for ease of navigation on **mobile devices**, and compliant with relevant **copyright** regulations, in line with LTU **Canvas Standards** and library/copyright guidelines. <https://www.swinburne.edu.au/intranet/learning-transformations/tools-and-resources/canvas/principles/>

10. Meets Swinburne **accessibility standards** as per WCAG 2.1AA guidelines to ensure access for all students at all times.

<https://www.swinburne.edu.au/intranet/learning-transformations/tools-and-resources/canvas/principles/>

-

*A Blended Learning Approach - Definition in online modules:*

**Blended learning** is the planned, systematic merging of physical and digital learning spaces to complement one another. It involves holistically weaving synchronous (online and face-to-face) and asynchronous content and activities to provide a more customised, student-centred learning experience. It is the "thoughtful integration of classroom face-to-face learning experiences with online learning experiences" (Garrison and Kanuka, 2004, p. 96) in SWINLearn, 2021.
